MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS 2200 MILL ROAD ALEXANDRIA, VA 22314-4677 (703) 838-1792

TONNAGE INDEX DECREASES IN SEPTEMBER

The adjusted monthly truck tonnage index fell 6.3 points in September 1991 from August 1991 according to the ATA Truck Tonnage Index. At a level of 186.3(p) with 1967 = 100, the September tonnage index is 3.3% below August's 192.6(r). The current month's adjusted index is 12.1 points (6.9 percent) above the year-ago level in September 1990.

The actual tons reported by motor carriers in the ATA survey increased 0.2% from 5.03 million tons in August to 5.04 million tons in September 1991. Adjustments for variations due to seasonality and the number of working (trading) days decreased the September index level to 186.3(p).

From August 1991, to September 1991, the Industrial Production index increased 0.1% compared to the adjusted general freight tonnage index decrease of 3.3%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

TONNAGE INDEX INCREASES IN OCTOBER

The adjusted monthly truck tonnage index rose 6.4 points in October 1991 from September 1991 according to the ATA Truck Tonnage Index. At a level of 192.7(p) with 1967 = 100, the October tonnage index is 3.3% above September's 186.3(r). The current month's adjusted index is 10.1 points (5.5 percent) above the year-ago level in October 1990.

The actual tons reported by motor carriers in the ATA survey increased 9.4% from 5.02 million tons in September to 5.49 million tons in October 1991. Adjustments for variations due to seasonality and the number of working (trading) days decreased the October index level to 192.7(p).

From September 1991, to October 1991, the Industrial Production index was unchanged compared to the adjusted general freight tonnage index increase of 3.3%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

TONNAGE INDEX DECREASES IN NOVEMBER

The adjusted monthly truck tonnage index fell 4.8 points in November 1991 from October 1991 according to the ATA Truck Tonnage Index. At a level of 187.9(p) with 1967 = 100, the November tonnage index is 2.5% below October's 192.7(r). The current month's adjusted index is 10.6 points (6.0 percent) above the year-ago level in November 1990.

The actual tons reported by motor carriers in the ATA survey decreased 15.8% from 6.80 million tons in October to 5.72 million tons in November 1991. Adjustments for variations due to seasonality and the number of working (trading) days increased the November index level to 187.9(p).

From October 1991, to November 1991, the Industrial Production index fell 0.5% compared to the adjusted general freight tonnage index decrease of 2.5%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

TONNAGE INDEX INCREASES IN JANUARY

The adjusted monthly truck tonnage index rose 11.2 points in January 1992 from December 1991 according to the ATA Truck Tonnage Index. At a level of 196.4(p) with 1967 = 100, the January tonnage index is 6.0% above December's 185.2(r). The current month's adjusted index is 17.7 points (9.9 percent) above the year-ago level in January 1991.

The actual tons reported by motor carriers in the ATA survey increased 10.5% from 6.03 million tons in December to 6.66 million tons in January 1992. Adjustments for variations due to seasonality and the number of working (trading) days increased the January index level to 196.4(p).

From December 1991, to January 1992, the Industrial Production index fell 0.9% compared to the adjusted general freight tonnage index increase of 6.0%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

Each year the historical Monthly Truck Tonnage Index is re-analyzed to determine the seasonal and trading day factors for the upcoming year. In this process, the prior years' factors also become modified as then does the historical adjusted Monthly Truck Tonnage Index for the past ten years. For your information, the revised indices for years 1982-1986 appear below; and the revised indices for years 1987-1991 appear on page two of the report.

	1982	1983	1984	1985	1986

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS 2200 MILL ROAD ALEXANDRIA, VA 22314-4677 (703) 838-1792

TONNAGE INDEX DECREASES IN FEBRUARY

The adjusted monthly truck tonnage index fell 1.6 points in February 1992 from January 1992 according to the ATA Truck Tonnage Index. At a level of 194.4(p) with 1967 = 100, the February tonnage index is 0.8% below January's 196.0(r). The current month's adjusted index is 19.6 points (11.2 percent) above the year-ago level in February 1991.

The actual tons reported by motor carriers in the ATA survey decreased 3.8% to 6.78 million tons in February from 7.04 million tons in January 1992. Adjustments for variations due to seasonality and the number of working (trading) days increased the February index level to 194.4(p).

From January 1992, to February 1992, the Industrial Production index rose 0.6% compared to the adjusted general freight tonnage index decrease of 0.8%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS 2200 MILL ROAD ALEXANDRIA, VA 22314-4677 (703) 838-1792

TONNAGE INDEX INCREASES IN MARCH

The adjusted monthly truck tonnage index rose 5.1 points in March 1992 from February 1992 according to the ATA Truck Tonnage Index. At a level of 199.2(p) with 1967 = 100, the March tonnage index is 1.6% above February's 194.1(r). The current month's adjusted index is 30.0 points (17.7 percent) above the year-ago level in March 1991.

The actual tons reported by motor carriers in the ATA survey increased 14.8% to 8.37 million tons in March from 7.40 million tons in February 1992. Adjustments for variations due to seasonality and the number of working (trading) days decreased the March index level to 199.2(p).

From February 1992, to March 1992, the Industrial Production index rose 0.2% compared to the adjusted general freight tonnage index increase of 1.6%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS 2200 MILL ROAD ALEXANDRIA, VA 22314-4677 (703) 838-1792

TONNAGE INDEX INCREASES IN APRIL

The adjusted monthly truck tonnage index rose 4.6 points in April 1992 from March 1992 according to the ATA Truck Tonnage Index. At a level of 202.9(p) with 1967 = 100, the April tonnage index is 2.3% above March's 198.3(r). The current month's adjusted index is 22.7 points (12.6 percent) above the year-ago level in April 1991.

The actual tons reported by motor carriers in the ATA survey decreased 1.8% to 8.60 million tons in April from 8.76 million tons in March 1992. Adjustments for variations due to seasonality and the number of working (trading) days increased the April index level to 202.9(p).

From March 1992, to April 1992, the Industrial Production index rose 0.5% compared to the adjusted general freight tonnage index increase of 2.3%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS 2200 MILL ROAD ALEXANDRIA, VA 22314-4677 (703) 838-1792

TONNAGE INDEX DECREASES IN MAY

The adjusted monthly truck tonnage index fell 0.1 point in May 1992 from April 1992 according to the ATA Truck Tonnage Index. At a level of 202.7(p) with 1967 = 100, the May tonnage index is .05% below April's 202.8(r). The current month's adjusted index is 25.9 points (14.6 percent) above the year-ago level in May 1991.

The actual tons reported by motor carriers in the ATA survey decreased 3.0% to 6.71 million tons in May from 6.92 million tons in April 1992. Adjustments for variations due to seasonality and the number of working (trading) days increased the May index level to 202.7(p).

From April 1992, to May 1992, the Industrial Production index rose 0.6% compared to the adjusted general freight tonnage index decrease of .05%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

TONNAGE INDEX DECREASES IN JUNE

The adjusted monthly truck tonnage index fell 0.7 point in June 1992 from May 1992 according to the ATA Truck Tonnage Index. At a level of 201.9(p) with 1967 = 100, the June tonnage index is 0.3% below May's 202.6(r). The current month's adjusted index is 25.7 points (14.6 percent) above the year-ago level in June 1991.

The actual tons reported by motor carriers in the ATA survey increased 8.1% to 8.03 million tons in June from 7.12 million tons in May 1992. Adjustments for variations due to seasonality and the number of working (trading) days decreased the June index level to 201.9(p).

From May 1992, to June 1992, the Industrial Production index fell 0.3% compared to the adjusted general freight tonnage index decrease of 0.3%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

TONNAGE INDEX INCREASES IN JULY

September 8, 1992

The adjusted monthly truck tonnage index rose 8.9 points in July 1992 from June 1992 according to the ATA Truck Tonnage Index. At a level of 210.4(p) with 1967 = 100, the July tonnage index is 4.4% above June's 201.5(r). The current month's adjusted index is 22.4 points (11.9 percent) above the year-ago level in July 1991.

The actual tons reported by motor carriers in the ATA survey decreased 2.4% to 7.68 million tons in July from 7.87 million tons in June 1992. Adjustments for variations due to seasonality and the number of working (trading) days increased the July index level to 210.4(p).

From June 1992, to July 1992, the Industrial Production index rose 0.4% compared to the adjusted general freight tonnage index increase of 4.4%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

TONNAGE INDEX DECREASES IN AUGUST

October 6, 1992

The adjusted monthly truck tonnage index fell 6.0 points in August 1992 from July 1992 according to the ATA Truck Tonnage Index. At a level of 203.8(p) with 1967 = 100, the August tonnage index is 2.9% below July's 209.8(r). The current month's adjusted index is 11.2 points (5.8 percent) above the year-ago level in August 1991.

The actual tons reported by motor carriers in the ATA survey decreased 0.4% to 7.65 million tons in August from 7.68 million tons in July 1992. Adjustments for variations due to seasonality and the number of working (trading) days decreased the August index level to 203.8(p).

From July 1992, to August 1992, the Industrial Production index fell 0.5% compared to the adjusted general freight tonnage index decrease of 2.9%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.
